

Practical Training and Capacity Building Workshop on the Globally Harmonised System of Classification and Labelling of Chemicals (GHS)

**Assisting the Public and Private Sector in Southern African
Countries with the Implementation of the GHS as an
Essential Risk Management Tool**

**With Assistance and Support of the UN Institute for Training
and Research (UNITAR) and the Responsible Packaging
Management Association of Southern Africa (RPMASA)**

**Durban, South Africa, 10-11 March 2011
Midrand, South Africa, 14-15 March 2011**

Final Report

PART 2

unitar

United Nations Institute for Training and Research

ANNEX 10

**PLENARY POWERPOINT PRESENTATIONS
(see separate file)**

Presentations	Page
Session 1: Opening Session	
• Short Introduction of Orange House Partnership (OHP)	70
• Short Introduction of UNITAR and its role in the GHS	75
Session 2: Principles of Hazard and Risk Assessment / History of the GHS	
• History of the GHS Development	80
• Principles of Hazard and Risk Assessment as the Scientific Basis of the GHS	85
Session 3: Physical Hazard Classification Criteria for Substances and Mixtures	
• Physical Hazards Part 1: Classification of explosives, flammables (gases, aerosols, liquids and solids), self-reactive substances and organic peroxides	93
• Physical Hazards Part 2: Classification of pyrophorics (solids and liquids) , self- heating and oxidising substances and mixtures, substances and mixtures which are corrosive to metals, and substances and mixtures which emit flammable gases on contact with water	100
Session 5: Health Hazard Classification Criteria for Substances and Mixtures	
• Health hazards, Part 1: Classification of substances and mixtures based on acute toxicity, specific target organ toxicity–single exposure (STOT-SE), aspiration, skin and eye corrosivity/irritation, and sensitization hazards.	109
• Health hazards, Part 2: Classification of substances and mixtures based on germ cell mutagenicity, carcinogenicity, reproductive toxicity and specific target organ toxicity-repeated exposure (STOT-RE) hazards	122
Session 7: Environmental Hazard Classification Criteria for Substances and Mixtures	
• Classification of substances based on acute and chronic (long-term) aquatic environmental hazards and on hazards to the ozone layer	128
• Classification of mixtures based on acute and chronic (long-term) aquatic environmental hazards	138
Session 9: Hazard Communication and Transport Specific Issues	
• Hazard statements, label elements, codification of statements, precautionary statements and preparation of Safety Data Sheets (SDS)	142
• Specific hazard issues in the Transport of Dangerous Goods and comparative analysis of the GHS and RTDG	149
Session 10: GHS Implementation and General Discussion	
• Status of the GHS implementation in Southern Africa	156
• South Africa Department of Labour: GHS Regulations	159
• Training and experience with GHS implementation in Uruguay	162
